Fast Email Verifier

- **Send Fast**. The speed of sending is the fastest on the market and limited only by speed of your network and by hardware con computer, so please download the product to evaluate. Includes a high speed sending engine that uses up 300 connections sin allowing incredible sending speeds.
- **Flash Animation movies** can be embedded in your email message. Unlike other email sending products our tool gives You a send Flash movies not as referenced file but embedded inside the message itself. So your message will deliver a high quality c and video.
- **High Personalization.** The tool allows you to send highly customized messages including personalized message bodies and p subject lines for each of your recipients. If You already have a list of customers in some files like Excel or other database You v all the data and personalize the messages exactly as You want. Advanced users can use ASP like VBScript to create email repo providing You the most flexible solution on the market .
- **Powerful List Management**. Manage an unlimited number of groups/lists with an unlimited number of recipients in each. M remove dublicates and perform many other operations.

AntiExtractor

- **Make Rich Colorful HTML** Messages. Now finally your messages will jump off the screen with rich HTML content! Our produ include any graphics, fonts and colors turning your messages into professional online brochures.
- **Database Abilities**. If You have large list of customers in some database like MS Access or SQL server You can send the mes from there marking every record after sending. Each message can be personalized using the database data.
- **File Attachment** . Send attached files, documents, coupons, or whatever else with your messages and as many as you need.
- **No Need in SMTP server.** E-Delivery Engine is a powerful group mailer which sends your message directly from your PC to t server without using any ISP's relay SMTP server. Any ISP provider has the restrictions on number of sending emails and E-Del solves all these problems. It gives instant confirmation of delivery by checking the address before it sent, which at 80% elimin undeliverable" messages you can get.
